INTERNSHIPS

Brototype | September 2022 - January 2023

- The internship program really helped me for developing my knowledge as a developer. it helped me to learn many tools and practice them.

PROJECTS

E-commerce | November 2022 - December 2022

- Developed an E-commerce website using node.js and express.js.
- using HTML, bootstrap, and CSS for the user interface.
- Worked with MongoDB for database management.
- Hosted in AWS.

Netflix-clone using React.js | January 2023 - January 2023

- This project is for understanding more about react js and studying different methods and hooks that are used in react. and also learned API integration in react js.

Olx-clone in react js | January 2023 - January 2023

- this project helped me to understand more about react.js. in this project have used firebase as a database, there is a user login signup option and on the home page the user can sell the project also the products will be listed on the home page and the product details page is also there.

To-Do-List using React.js | January 2023 - January 2023

- To-Do-List was my first project using React.js. it really gave me a clear understanding of the react js and react state management.

Music Web Application | February 2023 - February 2023

- This is my ongoing project using the MERN stack

WORK EXPERIENCE

Brototype | February 2022 - Present

- Mern Stack Developer Trainee
